Art Unit: 2875

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 U.S.C. § 112

2. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1.) In Claim 1, line 10 "notional rotation" is vague and indefinite because it is idiomatically incorrect.

As best understood the following prior art rejection applies:

Claim Rejections - 35 U.S.C. § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

4. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
5. Claims 1-10 are rejected under 35 U.S.C. 102() as being anticipated by (Luciani or Nakata). (Luciani or Nakata) discloses a vehicle headlight comprising: a reflector defining an optical axis, the headlight defining two horizontal half planes at different

Art Unit: 2875

heights; and a horizontal light source oriented in relation to the reflector transversely to the said optical axis, the headlight being such as to generate a beam of light radiation from said light source reflected from the reflector, in which the light beam defines a cut-off delimited by the said half planes, wherein the headlight further defines a horizontal axis transverse to the said optical axis, the reflector being divided into a first sector and further sectors, the first sector being obtained geometrically by notional rotation of the first sector about the said horizontal axis transverse to the optical axis, from an initial position in which the first sector is continuous with adjacent said further sectors without discontinuity, the first sector being adapted to generate images situated at the limit of the upper of the two said half planes.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kano discloses a segmented reflector which is similar to applicant's invention.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas M. Sember whose telephone number is (703) 308-1938. The examiner can normally be reached on Monday - Thursday from 8:00 AM - 5:00 PM. The examiner can also be reached on alternate Fridays.

Art Unit: 2875

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra O'Shea, can be reached at (703)-305-4939. The fax phone number for this group are (703) 872-9318 for regular communications and (703)-872-9319 for after-final communications.

Any inquiries of a general nature or relating to the status of this application should be directed to the group receptionist whose telephone number is (703) 305-0956.
